2.6.1. Programme Outcomes (POs) and Course Outcomes (Cos) and for all Programmes offered by the institution are stated and displayed on website and attainment of POs and Cos are evaluated.

In strict compliance with the objectives of Outcome Based Education (OBE), the Program Outcomes (POs), Program Specific Outcomes (PSOs) and Course Outcomes (COs) are framed by the department offering the concerned program after rigorous consultation with all faculty and the stakeholders. After attainment of consensus, the same are widely propagated and publicized through various means such as display and/or communication specified hereunder.

- Website
- Curriculum /regulations books
- Class rooms
- Department Notice Boards
- Laboratories
- Student Induction Programs
- Parents meetings
- Faculty meetings
- Alumni meetings
- Library Notice Boards

While addressing the students, the HODs create awareness on POs, PSOs and COs. The faculty members, class teachers, mentors, course coordinators, program/ISO coordinators also inform the students and create awareness and emphasize the need to attain the outcomes.

Program specific outcomes (PSOs) are the specific skill requirements and accomplishments to be fulfilled by the students at micro level and by the end of the program. The programme co-ordinators prepare the PSOs, usually two to four in number, in consultation with course coordinators. The Head of the Department and subject experts, of the individual departments will discuss the same and approve it after endorsement by the Principal.

Program Outcomes (POs) are broad statements that describe the professional accomplishments which the program aims at, and these are to be attained by the students by the time they complete the program. POs incorporate many areas of inter-related knowledge, skills and personality traits that are to be acquired by the students during their graduation.

Course outcomes (COs) are direct statements that describe the essential and enduring disciplinary knowledge, abilities that students should possess and the depth of learning that is expected upon completion of a course. They are clearly specified and communicated. The Course Outcomes are prepared by the course coordinator in consultation with concerned faculty members teaching the same course. The course coordinator will verify it. Finally, they are discussed in the concerned department's meeting course-wise and approved.

Dr. R. PANNEERDHASS, M.E., Ph.D.,

(Approved by AICTE, New Delhi & Affiliated to Anna university, Chennai)
Vadakuchipalayam, Kappiyampuliyur post, Villupuram-605601, Tamilnadu.

The POs/PSOs of the programme are published through electronic media at individual Department site located on the college website. The COs of the courses are also published through electronic media at the Department site located on the college website. In all the interactions with the students awareness on POs, PSOs and COs is consciously promoted.

In 2008, the College began with four Undergraduate Engineering programmes with an annual intake of 240 students, and now has six Undergraduate and programmes with an annual intake of 300 students. The AICTE's clearance and affiliation with Anna University for such a progressive intake is a testament to the college's consistent growth over the years. The college has grown considerably under the dynamic leadership of its Chairman Sri.G.Madhadevan, Vice Chairman Sri.M.Kuberan, B.E., M.Tech, Secretary Sri.M.Prabu, B.E., MBA., and Principal Dr.R.Panneerdhass, spear heading all academic and non academic activities.

VISION

To be world class nodal centre committed to advanced learning, research and training to serve the nation, meeting the national / international standards

MISSION

To be a premier Engineering College, much sought after by the industries and society offering professional education and training blended with ethical values to convert student resource into strong assets of our nation

OUR DEPARTMENTS

MECHANICAL ENGINEERING
Mechanical Engineering recently started in the year 2009 and offer B.E. Mechanical engineering.

CIVIL ENGINEERING
Civil Engineering is field of engineering sciences, related to Design, Construction and Maintenance of buildings.

ELECTRONICS AND COMMUNICATION ENGINEERING
The Department of Electronics and Communication Engineering was established in our college in the year 2011.

ELECTRICAL AND ELECTRONICS ENGINEERING
The Department of Electrical and Electronics Engineering was established in the year 2008 with the approval of AICTE.

COMPUTER SCIENCE & ENGINEERING
Computer Science and engineering Department has been running successfully 8 years and has also been accredited by AICTE.

SCIENCE AND HUMANITIES
The department of Science and Humanities was established in 1998 with the student strength of knowledge.

ARTIFICIAL INTELLIGENCE AND DATA SCIENCE
Professional experience of the faculty members bring a flavor and strength to research and development activities of the department.

CS8792

CRYPTOGRAPHY AND NETWORK SECURITY

L T P C
3 0 0 3

OBJECTIVES:

- To understand Cryptography Theories, Algorithms and Systems.
- To understand necessary Approaches and Techniques to build protection mechanisms in order to secure computer networks.

UNIT I INTRODUCTION 9

Security trends - Legal, Ethical and Professional Aspects of Security, Need for Security at Multiple levels, Security Policies - Model of network security - Security attacks, services and mechanisms - OSI security architecture - Classical encryption techniques: substitution techniques, transposition techniques, steganography- Foundations of modern cryptography: perfect security - information theory - product cryptosystem - cryptanalysis.

UNIT II SYMMETRIC KEY CRYPTOGRAPHY 9

MATHEMATICS OF SYMMETRIC KEY CRYPTOGRAPHY: Algebraic structures - Modular arithmetic-Euclid's algorithm- Congruence and matrices - Groups, Rings, Fields- Finite fields- SYMMETRIC KEY CIPHERS: SDES - Block cipher Principles of DES - Strength of DES - Differential and linear cryptanalysis - Block cipher design principles - Block cipher mode of operation - Evaluation criteria for AES - Advanced Encryption Standard - RC4 -

UNIT III PUBLIC KEY CRYPTOGRAPHY 9

MATHEMATICS OF ASYMMETRIC KEY CRYPTOGRAPHY: Primes - Primality Testing - Factorization - Euler's totient function, Fermat's and Euler's Theorem - Chinese Remainder Theorem - Exponentiation and logarithm - ASYMMETRIC KEY CIPHERS: RSA cryptosystem - Key distribution - Key management - Diffie Hellman key exchange - ElGamal cryptosystem - Elliptic curve arithmetic-Elliptic curve cryptography.

UNIT IV MESSAGE AUTHENTICATION AND INTEGRITY 9

Authentication requirement - Authentication function - MAC - Hash function - Security of hash function and MAC - SHA - Digital signature and authentication protocols - DSS- Entity Authentication: Biometrics, Passwords, Challenge Response protocols- Authentication applications - Kerberos, X.509

UNIT V SECURITY PRACTICE AND SYSTEM SECURITY 9

Electronic Mail security - PGP, S/MIME - IP security - Web Security - SYSTEM SECURITY: Intruders - Malicious software - viruses - Firewalls.

TOTAL 45 PERIODS

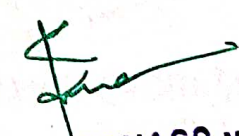

OUTCOMES:

At the end of the course, the student should be able to:

- Understand the fundamentals of networks security, security architecture, threats and vulnerabilities
- Apply the different cryptographic operations of symmetric cryptographic algorithms
- Apply the different cryptographic operations of public key cryptography
- Apply the various Authentication schemes to simulate different applications.
- Understand various Security practices and System security standards

Figure: Course Outcomes are defined in Syllabus by Anna University.

The screenshot displays the website for A.R. Engineering College. The page title is "B.E - COMPUTER SCIENCE AND ENGINEERING/ Intake 60/ Starting Year 2008/ Duration 4 Years". Under the heading "ABOUT COURSE", it states that the Department of Computer Science and Engineering (CSE) was established in 2008 with a mission to educate students from rural areas and improve their living standards. The "VISION OF DEPARTMENT" is to impart knowledge in Computer Science and Engineering with advanced learning to meet international standards. The "MISSION OF DEPARTMENT" is to excel in teaching by offering professional education imbued with ethical and moral values. The "PROGRAM OUTCOMES" are listed as follows:

- PO 1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO 2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO 3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO 4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO 5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO 6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO 7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO 8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
